## Ahmedabad Metro Rail Phase II on fast track, makes significant strides

**W**ith rapid advancement in its infrastructure, the Ahmedabad Metro Rail Phase II is making significant strides. A major element of the expansion is the Sabarmati Bridge, stretching over 1 kilometer and composed of 23 spans -each span being 41.80 meters in length.

12 of the 23 spans have already been completed. Notably, the Gujarat Metro Rail Corporation Limited (GMRCL) is executing each span with remarkable efficiency, accomplishing each span's

superstructure construction within just six days. GMRCL also shared that the train trials are slated for April 2024.

As the city continues to evolve and modernize its public transportation infrastructure, Ahmedabad Metro Rail Phase II remains on track to enhance connectivity and accessibility. In Phase II, the connectivity from Motera to Narendra Modi Stadium, Gandhinagar Sector 1, and the Gift City's 20-kilometre priority section is under progress.
