Here comes the occasion to hail India's engineering prowess and feel the pride of riding a 'Made-in-India' coach as indigenously made Metro train arrives in Ahmedabad. So, next when you take Metro, bask in your informed decision to use the public transport not just for convenience but also for opting for environment-friendly commuting that has India's technological advancement all along.

This would be the first Metro train built in India. Gujarat Metro Rail Corporation Limited (GMRL) has placed an order for 10 trains with Kolkata-based Titagarh Rail Systems Limited. With completion of 21 km of phase-2 and the remaining route to be dedicated soon, additional trains would be needed to serve on these lines. Ahmedabad Metro caters to more

The train, made of high-grade stainless steel, has been designed that reflects Amdavadi culture

than 1.6 lakh people daily, and the passengers' number is growing at 30-40% annually.

"These trains are being fully manufactured in Titagarh facilities in Kolkata under the 'Make In India' policy of the government. The plant has been setup with the most modern and state-of-the-art technology

and equipment to produce modern metro and passenger coaches," said a senior Ahmedabad Metro official.

The trains, which are made of high-grade stainless steel, have been designed with special colours and patterns, reflecting the culture and tradition of Ahmedabad, while incorporating the latest safety and performance features.
